DETAILED ACTION

Allowable Subject Matter

1. Claims 1-53 are allowed.
2. The following is an examiner's statement of reasons for allowance: in regard to the independent claims, none of the prior art, alone or in combination teaches or suggests the limitations therein including the steps or structures for dividing a digitized scan line into a plurality of intensity pixels, wherein each of said intensity pixels includes at least one data point of plurality of signal intensity data points, determining a raw intensity level for each of the plurality of intensity pixels, determining a feature gain factor for each pixel of the plurality of intensity pixels, calculating a corrected intensity level for each of the plurality of intensity pixels by multiplying the raw intensity level for each intensity pixel by the feature gain factor for the corresponding intensity pixel; and displaying the corrected intensity level of each of the plurality of intensity pixels. The closest reference to Roundhill et al. (US 5,908,389) teaches a method and system for speckle reduction in ultrasonic images but fails to teach specifically the steps and structures mentioned above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure (please see attached "Notice of References Cited").
